Cremated Remains Area Project

The project is continuing, and several team meetings have taken place on site. A survey was undertaken of the memorial stones from which the accompanying plan has been compiled. We have been requested by the Diocese of York to publicise as much as possible our proposals to modify the cremated remains area before seeking an official faculty to proceed. Notices have been placed in various locations around the village and on the Benefice website.

Currently there are 65 "spaces" within the current area and 48 memorial stones. The enlargement would accommodate a further 35 memorials in an area of nominally 14 metres by 5 metres bounded by "mowing" stones. The Team have also considered having the existing area bounded by mowing stones and a new area located to the East of this. This and a further (3rd) area located towards the south hedge will be priced before a final decision is made. .

I have already had a number of inquiries from the deceased relatives and am pleased to say they were all very positive, including some willing to offer donations. Currently we are hoping that as many relatives as possible will be in contact with us during this consultation phase of the project. Following all the necessary consultation and protocols I am hopeful that a contractor should be appointed by mid August.
